Syllabus

Description: This practical course aims at introducing a selection of the most important topics in terms of their specific field of study. The focus is on helping students use and practice specific structures, which means that we propose to solve practical issues, searching for answers to some relevant topics. One important goal is to provide a better understanding of the English specialized language, but also to help our students improve and enrich their vocabulary in their field of study.

Objectives:

- to enhance the receptive (listening and reading) and productive skills (speaking and writing);
- to use and practice English in specific academic and professional contexts;
- to enrich students' vocabulary in fields related to their academic knowledge.
